4. AIMS AND OBJECTIVES : The aims and objectives for which the society is established are as under :-
 - To work for the educational upliftment of the rural and general public irrespective of caste, sex, creed and religion.
 - Poorest sections of Indian population suffer from severe deprivation. The society aims to send the poorest children in India to school, support them in their fees, school uniforms and extend financial support to family for loss of income due to child withdrawing from work as child labour.
 - The project will also run evening classes to support these children in their homework and exam preparation. Our volunteering teams run campaigns to encourage the poorest people to withdraw their children from labouring jobs and send them to school. We continue to monitor that children do not drop out in early classes and attain 12th class education as a minimum.
 - Our organisation seeks to improve the lives of the poorest families through promoting education, both encouraging children to stay in school, and encouraging parents of child labourers to enrol their children in school. We seek to achieve this through ed
 - ucational campaigns, providing additional financial support for families (school fees, uniforms, compensation for lost), and providing after-hours study spaces and tutoring support.
 - By providing vulnerable children with an education, we seek to improve their future employment and economic opportunities, to improve their overall socio-economic status, and ultimately pass on these benefits to their families and the broader community.
